

# AmazaCart Featured Products Module

## UserGuide

Add products you want to highlight for customers – maybe because they are new – maybe because they are the most popular. You choose which products you want featured in a specific category or subcategory.

Your customers will see Featured products thumbnails in the separate dialogue window. Featured products (which may be the products with some discounts or just new products in your shop) can be added from any category you like and help you to motivate your customers to continue shopping.

You can select what your featured products will look like in the Customer store. It can either be a separate dialogue window with the product thumbnails (Figure below)

Figure: Featured products thumbnails

or the list of the products with the thumbnails and some description (Figure below).

Figure: Featured product list

For that, select **Icons** or **List** in 'Featured products look&feel' drop-down list on the *Module settings* page (Figure below). And then click on '**Submit**'.

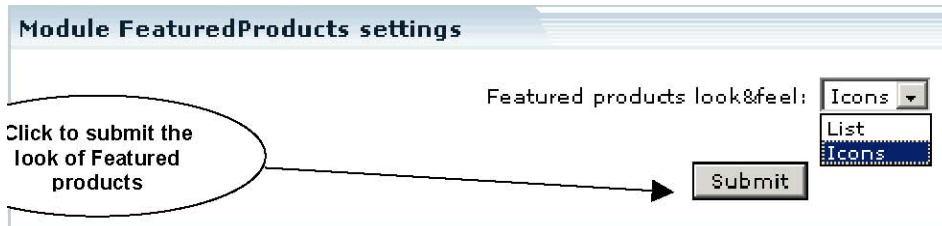

Figure: Module Featured Products settings

To add a featured product:

1. Click on *Categories* in the *Management* menu.
2. *Manage categories* page will appear.
3. Pass on to the *Add featured products* dialogue.
4. Fill in the fields in the Search form, and then click on '**Search**' to find a product or all products in a category.
5. Check out a necessary product from the list of the products found.
6. Click on '**Add**'.

Add	Title
<input type="checkbox"/>	Designing Web Usability
<input type="checkbox"/>	Dreamweaver 3 Bible : Gold Edition
<input checked="" type="checkbox"/>	HTML 4 for the World Wide Web
<input type="checkbox"/>	Javascript (Definitive Guide)
<input type="checkbox"/>	New Masters of Flash
<input type="checkbox"/>	Professional Java Server Programming
